PLANOSPHERICAL MACHINE for PLANOSPHERICAL MACHINE for CRUSHING, GRINDING and PULVERIZING, Recently Patented in this Country and in Europe.

COCHRAN'S PLANOSPHERICAL QUARTZ-CRUSHING and PULVERIZING MACHINES, of various sizes, from 2 to 10 feet in diameter, and weighing from 500 lists, from 2 to 10 feet in diameter, and weighing from 500 lists, to 10 tups each, are now in daily operation for the inspection of the public, and will be submitted to any reasonable practical tests proposed by parties interested.

These machines, by their simplicity of construction, their durability, the undoubted principles upon which they operate, their effective operation and result, are justly entitled to the consideration of all parties engaged in grinding, crushing, and pulverizing Quartz, Zinc Ore, and an other ores, or

to the consideration of all parties engaged in grinding, crushing, and polivering Quartz, Zinc Ore, and an other ores, or mineral substances.

It is the peculiar feature of the economy of these machines that they are found capable of crushing and poliverizing into the finest powder any amount of Quartz or other earthy matter in proportion to the amount of weight or power applied. The earthy matter is so completely ground and pulverized, that the gold may be easily separated, and subjected to any process of amalgamation that may be necessary.

The machines work and deliver wet or dry, as may be required, and run with little friction (being almost without machinery,) requiring no lubricating: the principle unon which they operate precludes the possibility of their being put out of order; nor do they heat any material while being puterized. They are at once applicable for all purposes of principle and pulverizing, from those required by the Drugsts to those of the most extensive operations in California and Australia.

in those of the most extensive operations and will prove by practical tests the vast apperiority and economy of these machines over any other, for crushing, grinding, or pulverizing, heretofore offered to the public.

These machines may be seen in operation at foot of South Eighth-st., Williamsburgh; at the large Patent Block and Saw Factory of Mesus Burr, Waterman & Co., first street south of Peck-slip Ferry, every day, from 7 to 9 A. M., and from 4 to 6 P. M. For further particulars apply to E. & J. BUSSING & CO., No S. Chiff-st., N.Y.
